

# Curriculum Implementation Support Services

## Build Equitable Instruction In Your District Today

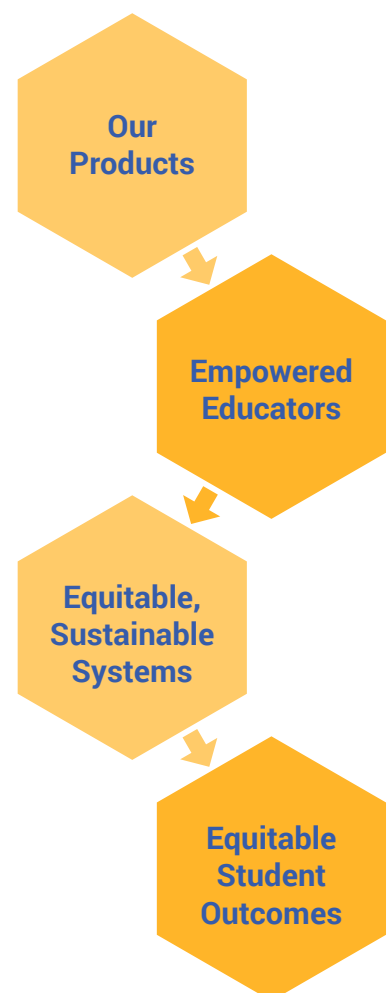

**Pivot Learning helps districts build the systems and capacity to deliver excellence to every student, every day.**

Recent research indicates that many students have inequitable access to grade-level materials and instruction. We know that to create equitable student outcomes, we must provide educators across a district ecosystem with the skills, knowledge, and tools to implement high-quality curricula.

That's why Pivot Learning and UnboundEd are committed to helping districts and schools build their capacity to create the systems they need for sustainable implementation of high-quality ELA and math instructional materials that produce equitable student outcomes.

**Our unique, holistic approach to ensure instructional equity**

We work side-by-side with your team to build systems that result in sustainable change. Pivot Learning and UnboundEd are the only educational partnership that offers a suite of services to support a district across its ecosystem—from teachers to superintendents—to successfully implement K-12 Math and ELA curricula centered on equitable student outcomes.

# Our curriculum implementation services support districts committed to equitable student outcomes

## We build capacity for equitable systems

Our services empower educators to design equitable, sustainable curriculum implementation systems. We build, launch, and test these systems using continuous improvement strategies. We know that effective systems are built by collaboration across district and school teams. That's why we require that districts engage staff from school sites as well as district leadership.
