

Curriculum Implementation Support Services

Build Equitable Instruction In Your District Today

Pivot Learning helps districts build the systems and capacity to deliver excellence to every student, every day.

Recent research indicates that many students have inequitable access to grade-level materials and instruction. We know that to create equitable student outcomes, we must provide educators across a district ecosystem with the skills, knowledge, and tools to implement high-quality curricula.

That's why Pivot Learning is committed to helping districts and schools build their capacity to create the systems they need for sustainable implementation of high-quality ELA and math instructional materials that produce equitable student outcomes.

Our unique, holistic approach to ensure instructional equity

We work side-by-side with your team to build systems that result in sustainable change. We provide guidance, support, and tools to help your team create systems that are high-quality, effective, comprehensive, and drive towards closing the opportunity gap.

Our curriculum implementation services support districts committed to equitable student outcomes

Pivot Learning offers a suite of services that support a district across its ecosystem — from teachers to superintendents — to successfully implement K-12 math and ELA curricula centered on equitable student outcomes.

ELA/MATH PEDAGOGY ACADEMIES	SITE-BASED IMPLEMENTATION SUPPORT*	IMPLEMENTATION MANAGEMENT*
Professional learning workshops that develop teacher and coach understanding of research-based ELA and math practices and standards	On-site classroom observations to build principal, coach, and teachers' ability to implement curricula with integrity	Collaborative management of implementation with an implementation project manager including: coaching, facilitation, change management, policy definition, communications, and evaluation
Commitment: 3–5 Days	Commitment: 1–2 Years	Commitment: 1–3 Years
Stakeholders: Coaches, Teachers	Stakeholders: Coaches, Teachers, School Site Administrators	Stakeholders: District Leadership

* These services are required as part of a curriculum implementation support program with Pivot Learning.

We build capacity for equitable systems

Our services empower educators to design equitable, sustainable curriculum implementation systems. We build, launch, and test these systems using continuous improvement strategies. We know that effective systems are built by collaboration across district and school teams. That's why we require that districts engage staff from school sites as well as district leadership.
